## WRITING

I'd like to write a report about changes in spending free time.

~~It's hard to judge, but~~ I can say that there are a lot of changes that have taken place over the last twenty years. For instance, twenty years ago using computers and other electronic devices was not as common as now.

It's believed to think that people preferred to read and go outdoors, spending their free time. Nowadays ~~everything~~ is young people would rather go to the computer club or watch a movie, ~~rather than to find a~~ challenging activity. ~~Using a lot of~~ Scrolling the Surfing the Net is absolutely in vogue now. But there is a bit of procrastination in this kind of activity. That's why I'm sure that these changes have been for the worse. A lot of teenagers lost themselves pretending different person in the Internet.

I want to recommend teenagers to look around them and see how life is beautiful even without a smartphone.

Technologies are becoming improved every year. It illustrates that in the future will be a lot of activities which will be ~~created~~ <sup>created in the</sup> Internet. There will be more ways to immerse people into the world of technology.

To conclude I want to say that people should avoid the mainstream-hobbies and listen only to their inner voice.
