WRITING (25 minutes)

The screenshot shows the website for 'EXPERIMENTARIUM'. The navigation bar includes 'Visit Experiences Corporate', 'ABOUT US', 'SALES', 'PRESS', 'CONTACT', and 'RESERVE'. A banner at the top right says 'Open today 10:00 - 17:00 Plan your visit'. The main content area features six exhibit cards:

- ENERGY ZONE**: In the Energy Zone, you can get a clear sense of how much energy is required to watch TV – and you can try lifting your own carbon footprint.
- HOUSE OF INVENTIONS**: What makes a good invention? In the House of Inventions, you set out on a journey of discovery into the mind of the inventor.
- CIRCUS PHYSICUS**: Immerse yourself in fun and amazing physics phenomena, and find out about the science behind them.
- THE TUNNEL OF SENSES**: Take a trip through the Tunnel of Senses, a voyage of discovery into your own senses where you feel, listen, see and smell your way to new knowledge about yourself.
- BE SEEN BE SAFE**: Try out the truck simulator and see for yourself how difficult it is to see what is happening on the road when it's dark.
- THE LABYRINTH OF LIGHT**: In the Labyrinth of Light you can play tunes on the laser harp, examine the colourless room and try moving faster than your own shadow.

A new scientific fun house, *The Experimentarium*, has been built in your town. The main aim of this centre is to show kids that science is not boring – it's fun. It is a museum where kids can take part in different scientific experiments and make virtual tours to any place imaginable. As a reporter for your school magazine you have to prepare an article on it, providing its readers with **the following details**:

- **introduction**
- **the design of the scientific fun centre**
- **interactive activities kids can take part in**
- **other services which *The Experimentarium* centre offers**
- **conclusion**

Write your report in 100-120 words.

Welcome readers to our school magazine "Story Teller".
Today we are reviewing a new museum "The experimentarium".
Inside we can see a lot of paintings.
There are lots of activities like energy zone where you can get a clear sense of how much energy you need to live in comfort or in

7-8 классы
"Circus physics" where you can immerse yourself in fun and amazing physics phenomena and find out about the science behind them. There is a shop where you can buy books, games or puzzles. I recommend to go to the Experimentarium if you want to know more in an interesting and fun form.
