young people's

There is no doubt that ~~the~~ ways of spending free time is changing. As part of my report, I would like to carry out an investigation into changing trends in the way young people spend their free time.

To begin with ~~Firstly~~, ~~go~~ young people used to have no access to the internet, which means that they lead active social lifestyle, which was full of meetings with friends. ~~Nowad~~ But things have recently changed over the last twenty years and now one of the most preferable way of spending free time for young people consists in the usage of social networks, where they chat with each other, watch different videos, listen to music and so on.

In my opinion, such changes have both pros and cons. Speaking about advantages, I would point out the opportunity to find friends all around the world and communicate with them without any problems. As for disadvantages, it is ~~a~~ worth mentioning that ~~young~~ young people can become addicted to the internet and it may be difficult ^{for them} to ~~meet~~ ~~get acquainted~~ ~~we~~ meet ~~real~~ people in real life. So that, they can reach the state of being absolutely anti-social ~~which~~ ~~that~~ ^{and}, of course, it is really ~~damaging~~ ^{can} exert an awful influence on their psychological well-being.

Taking into consideration ^{all} ~~all~~ aforementioned information, I would like to highlight again ~~z~~ that the situation has both positive and negative effects on young people. So, I suggest that in the future it will remain almost the same as now and no changes will be made.
