WRITING

The way young people spend their free time can be different. Some playing computer games, some hanging out with their friend and others do their hobby. But 20 years ago, a lot of ~~people~~ young people were spending their free time outside because there were very few video games and not everyone could buy them. After that computers started to develop really fast and people, who ~~was~~ were spending their free time on computer became more and more.

On the one hand, it's not that bad, they can still learn things while playing or messaging.

But on the other hand, ~~while~~ spend free time like that is not healthy at all.

They don't move, Breathe unfresh air and always staring at one position.

In the future, I think that more and more people will ~~st~~ start to spend their free time near computer. Because they are developing so fast that almost everybody wants to ~~try on~~ spend free time near them.
