The dangers of being too ambitious

Have you ever had a ambitious plans
*o for your future life? It's totally agreed
that most of the teenagers or kids had
a big dreams about their ~~career~~ ^{future work} career
or their future family, but is it really
psychically safe to be too at ambitious?

~~Firstly, let's look on this problem, according~~
Experts emphasize that having ambitions, dreams or plan is naturally for human and without knowing meaning of his life he/she would become depressed, would become more weak and vincible for illness.

On the other hand being too ambitious, especially with no real plan or even doing something, is psyhically danger because you're taking a risk of don't reach your aim and get depression.

So how to choose your way in life?
I consider that the secret is to connect your work with the thing you like to do the most, but it's unfair to ~~not~~ state that you must practise, in practise in thing that would be appreciated.

In conclusion with the arguments below we could say that people should make their aim realistic and do their best at their favourite ~~wo~~ hobby.
