## WRITING

The report is intended to show changing trends in the way young people spend their free time.

In modern society there are noticeable changes in the forms of spending free time among young people, as their preferences have changed a lot through the decades. Old traditions, and forms of entertainment are being replaced by new ones, being influenced by development of technology, social changes and cultural diversity. For example, at the beginning of the 21<sup>st</sup> century Russian youth used to love going to clubs, fishing, countryside activities, watching TV and DVD. Modern young people in my country, due to new technologies, prefer surfing the Internet and playing online games. Nevertheless, modern youth can spend more their free time for additional education or their hobbies. All thanks to advances in technology. But because of availability of Internet and modern technology, young people have started to replace their real lives with virtual ones. This can lead to serious addiction.

As technologies are rapidly developing, this situation can get worse. People can become addictive to the Internet or games, and

forget about all advantages that real life has.  
We should try to regulate our online  
activities and to talk about harmful  
influence of forms of spending our free time.

In conclusion, we should do more to  
prevent the development of harmful leisure  
activities

Оценочные баллы: максимальный – 10 баллов; фактический – 9 баллов.
